CIA Uncovers Chinese Plot To Just Sit Back And Enjoy Collapse Of United States

Published January 14, 2024

WASHINGTON—Putting the nation on alert against what it has described as a “highly credible national security threat,” the CIA announced today that it has uncovered a plot by the Chinese government to sit back and enjoy themselves while the United States collapses of its own accord.

Multiple official sources confirmed that the Chinese government, its military and intelligence agencies intend to carry out a massive, coordinated plan to stand aside and watch America's increasingly rapid decline, with Chinese operatives across the globe reportedly mobilizing to take it easy, relax, and savor the spectacle as it unfolds.

"We have intercepted electronic communication indicating that the Chinese Communist Party leadership is actively plotting to stay out of the way while America as we know it gradually crumbles under the weight of its own self-inflicted economic problems and general disrepair," CIA Deputy Director Mark F. Giuliano told the assembled press corps. "If this plan succeeds, it will leave behind a nation with a completely dysfunctional economy, collapsing infrastructure, and a catastrophic health crisis afflicting millions across the nation. We want to emphasize that this danger is very real."

"And unfortunately, based on information we have from intelligence assets on the ground, this plot is already well under way," he added.

A recently declassified CIA report confirmed that all known CCP-affiliated organizations—from the Ministry of State Security to allied governments in the DPRK, Russia, Laos and elsewhere—have been instructed to kick back and enjoy the show as the United States' federal government, energy grid, and industrial sector are rendered impotent by internal dissent, decay, and mismanagement. According to statements made by top-level informants and corroborated by leading Western national security experts, if seen through to its conclusion, China's current plot could wreak far more damage than the events of 9/11.

In the past year, money transfers to Chinese intelligence cells around the world have reportedly been accompanied by instructions to use the funds to outfit safe houses with the proper equipment to receive American cable news broadcasts and view top U.S. news websites, allowing Chinese agents to fully relish each detail of the impending demise of the last global superpower.

Additionally, CIA officials made public an internal CCP video today in which the communist party's leader Xi Jinping chillingly exhorts his followers to "take a load off" and "unwind" in the name of national rejuvenation, and really cherish the victory over their enemy.

“Comrades take heart, for soon every American city shall be plagued with disaster and hardship,” Xi said in the video, which includes several minutes of footage of young, uniformed PLA soldiers casually sipping beverages as they thumb through the latest issues of *Time* and *U.S. News And World Report*. “The imperialists have brought this pain and destruction upon themselves through their arrogance and callousness. Soon, the United States will watch in horror as its bridges crumble, its desperate citizens suffer in want of medicine and paying employment, and its once vast riches are reduced to naught. The patriotic warriors among our ranks must now unite, get comfortable, and look on from afar at the calamity unfolding in the West.”

“We vow that we will not cease sitting around and laughing it up until America is reduced to rubble,” he continued.

Xi, who is seen in the video reclining back in his chair, putting his feet up, and flipping on CNN, later shouts “Death to Imperialism” when a story is aired about the decade-long trend of stagnant wages among American workers.

The CIA has also warned that numerous Chinese agents may have established sleeper cells for the purpose of “getting a kick out of” the nation’s downfall on American soil. The agency urged U.S. residents to use caution around schools, hospitals, legislative bodies, prisons, and other decaying institutions whose imminent failure Chinese agents may wish to observe up close.

Speaking on condition of anonymity, one high-ranking U.S. national security official has described the present situation as a massive failure of intelligence.

“The warning signs were there all along, but unfortunately we failed to heed them,” said the official, who advised Americans to brace for widespread devastation. “If we’d listened to experts or even our own common sense, we would’ve realized that this plot was being actively orchestrated within our own borders. But we didn’t, and now every one of our citizens and our very way of life is at risk from this threat.”

“Sadly, China has us right where they want us,” the official added, “and at this point, I fear it is too late to do anything about it.”
